

KBPROC® Strategic Alignment

Petroglyph Project Analytics, in partnership with TriGem Technology Ltd. is pleased to present APEX, the only pipeline industry specific software that provides integrated cost and schedule estimating functions.

KbProc.APEX is being offered exclusively through Petroglyph Project Analytics.

In-depth discussions with Lorne and his team identified clear synergies and the opportunity to work together for the benefit of clients was recognized as natural and complementary.

APEX is a client-server system specifically designed for the pipeline industry and will support the development of detailed estimate data for the construction of major pipelines. The advanced pipeline estimating & execution planning software is purpose-built and allows for comprehensive construction cost & schedule modeling.

Is it time to leverage APEX on your pipeline project?
